The 2007 Australian International Aerospace & Defence Exposition will witness the launch of **Air Maestro™** (Version 1.1).

Air Maestro™ is a web based service which enables aviation operators to enhance the Safety, Efficiency and Quality of their personnel and operational environment. **Air Maestro™** gives you control of core operational information which empowers aviation operators to effectively manage their business and to achieve regulatory compliance.

Air Maestro™ has a wealth of integrated features and capabilities supporting:

-  Resource Planning
-  Operational Control & Performance
-  Client Management (not included in Version 1.1)
-  Fatigue Risk & Safety Management

Air Maestro™ provides a vital step in the advancement of multi level controls that are the foundation for Safety Management Systems, including Fatigue Risk Management policies and practices.

Air Maestro™ is a web-based service allowing personnel to update and manage operational information anywhere, anytime via secure connection over the internet.

The features and capabilities of **Air Maestro™** (Version 1.1) include;

-  Electronic Flight & Duty entry with automatic updating of Pilot Log Book
-  Company & Base view of individual's Flight & Duty status 24*7
-  Rostering integrated with Flight & Duty to enable planned v actual comparisons
-  Leave & Allowance management integrated with Rostering and Flight & Duty
-  Work Practice Controls and FAID integrated with Rostering and Flight & Duty
-  Recency management including alerting (email & sms)
-  Occurrence & Hazard reporting including follow up forums available to all relevant personnel and third parties including alerting (email & sms)

“We already have operators relying on **Air Maestro™** in their daily operations and we are receiving significant interest from the General Aviation market prior to our product launch, at the Avalon Air Show.” Avinet’s Chief Executive Officer Trent Loebel said.

“Our existing clients include The Royal Flying Doctors Service South Eastern Section, Heli Air and Air National Australia. **Air Maestro™** is allowing them to enjoy real improvements in the efficiency and effectiveness of their operations. We are grateful to each of them for their support and contribution to the ongoing development and enhancement of **Air Maestro™**.”

Initially we will focus our attention on servicing existing and prospective clients in the Australian and New Zealand markets. Following this, we will establish a presence in other countries and markets.

Avinet is an Australian software company that was established in early 2005. With substantial aviation knowledge and IT expertise, Avinet saw the opportunity to create a web-based product to assist aviation companies to more effectively and more safely manage their business.

Avinet are exhibiting **Air Maestro™** and its capabilities at the South Australian Government stand located Hall A, stand IC16.

Avinet has offices in Sydney, Melbourne and Adelaide.
